Price of solar panels installed on the roof of an island

Overview

On average, a homeowner can pay between \$16.15 and \$25.40 per installed square foot, or \$4.50 to \$8 per installed watt, making a solar roof one of the most expensive solar options. How much does a solar panel installation cost?

Cost Per Kilowatt Installed Solar panel installation costs vary significantly based on location, system size, and quality. Here are 2025 average costs across major markets: Example: A typical 6 kW residential system costs between \$15,000 and \$36,000 before incentives, depending on your location and chosen components.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

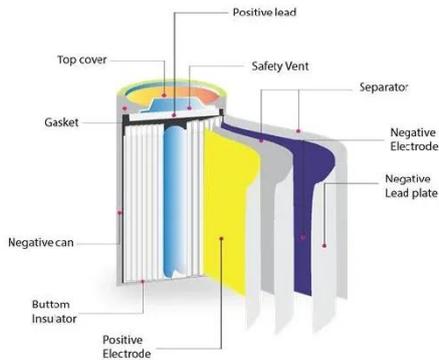

How much does a solar roof cost?

For example, Tesla Solar Roof costs around \$75,000 for a complex design. However, if you have a smaller home or want to install only a few integrated solar shingles, you might be able to finish your project for as little as \$15,000, with all fees included. A solar roof can save you money on your energy bills, so you recoup the cost in the long run.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt.^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.
