# Price quote for a 100kW solar-powered container for mining in Australia

## Overview

---

How much does a 100kW Solar System cost?

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The graph below - from our Commercial Solar PV Price Index - shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

How much does solar power cost in Australia?

Accordingly, the uptake of commercial solar power has increased significantly in Australia in the last several years. As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate.

What is a 100kW Solar System?

100kW solar systems are among the most popular commercial solar system sizes in Australia, as this size is the cutoff point for up-front incentives through the federal government. This article provides an overview of most of the key points that businesses need to know if they are considering a 100kW solar system for their commercial premises.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.
