

## BLINK SOLAR

# Price quote for a 10kW mobile energy storage container for Australian farms

## Overview

---

How much does a 10kW solar battery cost in Australia?

The answer depends on several factors including brand, battery chemistry, installation requirements, and whether the system includes an inverter or monitoring tech. In 2025, the average 10kW solar battery price in Australia typically ranges from \$9,000 to \$16,000, depending on specifications and brand. Here's what influences the cost:

Should you invest in a 10kW solar battery storage system?

For those who already have solar panels or are considering a full solar power setup, investing in a 10kW battery storage system can significantly enhance energy performance and long-term value. What Is a 10kW Solar Battery?

A 10kW solar battery refers to an energy storage system capable of delivering 10 kilowatts of power output.

How much does a 10kW Solar System cost?

If you don't already have rooftop solar, you'll need to budget \$8,500 – \$13,000 for a quality 10kW PV array (after applying today's federal STC “ solar rebate ”). Add the battery, and you're looking at a total 10kW solar system with battery price of roughly \$20,000 to \$27,000 before the battery rebate.

Where can I find the best 10kW solar battery price?

Australian Design Solar offers the best 10kW solar battery price across Sydney, Melbourne, Brisbane, and Adelaide, providing affordable, high-quality solar storage solutions.
