Price quote for a 10kW solar-powered container for mining in Australia

Overview

According to Solar Choice's own data, the average 10kW solar system price in Australia as of July 2025 is about \$0.91 per watt - or about \$9,130 after the federal STC rebate is deducted. Are 10kW solar systems a good investment in Australia?

10kW solar systems are a great investment for Australian homes with high levels of electricity consumption or businesses with relatively small electricity needs. This article takes a look at 10kW solar system pricing, energy production and returns in Australia. How many panels & how much roof space for a 10kW solar system?

.

How much does a solar system cost in Australia?

Solar Choice publishes a monthly Solar PV Price Index that tracks average pricing trends in every capital city in Australia. According to Solar Choice's own data, the average 10kW solar system price in Australia as of July 2025 is about \$0.91 per watt - or about \$9,130 after the federal STC rebate is deducted.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

What is a 10kW Solar System?

10kW solar systems are on the large side for residential installations (where 5kW to 6.6kW is much more common). So as mentioned above, 10kW systems tend to be most appropriate for homes or businesses with significant amounts of daytime electricity consumption above 40kWh per day.
