Price quote for a 50kW collapsible container for European farms

Overview

What is a hydroponic container farm?

VR 360-degree viewing of the internal structure of the container Hydroponic container farms are shipping containers as shell and insulated according to climate conditions. Used or new shipping containers are both can be used as outer shell but shipping containers strength is important for long lasting.

What is a shipping container vertical farm?

The shipping container vertical farm actually is a small greenhouse with a complete hydroponic system, but more strong and which can cope with many complex climates and environments. That is one of the solutions by people to deal with land desertification, lack of water resources, or lack of land.

Why are shipping containers used for container farms?

The shipping containers are used for these container farms because they are compact, available to transfer everywhere in the world, they are solid and can be customized as a plug and grow machine. It's a completely turn key agricultural system without worries about the weather, pests, heating prices or water.

How do container farms work?

These container farms utilize artificial control of light, environmental control of humidity, temperature, gases, fertigation and other environmental factors to set an optimal growth medium for plants. VR 360-degree viewing of the internal structure of the container
