Purchase your own rooftop solar panels

Overview

What is a DIY roof mount solar panel system?

DIY roof mount solar panel systems are solar panel kits designed for installation on rooftops. They make use of your home's rafters to support the weight of the solar array. Shop our selection of DIY roof mount solar panel kits for both grid-tied and off-grid properties. Roof mount systems are the standard choice for most home solar installations due to their convenience and cost-effectiveness.

Should you install a rooftop solar system for your home?

It not only helps homeowners reduce their electricity costs but also makes available an Eco-friendly energy source for their homes. If you're considering installing a Rooftop Solar System For your Home, this step-by-step guide will help you understand the process.

Should you put solar panels on your roof?

Installing solar panels on your roof is suitable if you have limited yard space and cannot fit a ground mount on your property. A viable South, West or East facing roof with enough space to build your array makes rooftop solar panels the most cost-effective option.

What is rooftop solar power?

Rooftop solar power, also known as rooftop photovoltaic (PV) systems, refers to solar panels installed on residential or commercial building rooftops to generate electricity. These systems convert sunlight directly into electrical energy through photovoltaic cells, providing clean, renewable power for your home or business.
