Quote for UPS solar container outdoor power in Sydney Australia

Overview

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

What is a solar skid shipping container?

At SCS Australia, we provide advanced solar skid shipping containers designed to deliver reliable, renewable energy wherever you need it. Perfect for remote projects, off-grid living, and temporary sites, these containerised solar systems combine durability, portability, and sustainable performance.

Do I need an electrician to install an Offgrid shipping container?

If you are using the container as a permanent power supply, an electrician will be required to install suitable earthing & testing. Our offgrid shipping containers are a self-contained offgrid energy system with batteries, solar panels, inverter/charger/MPPT solar charger & monitoring system, designed to make solar easy, reliable & affordable.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?
