RV equipped with flow battery

Overview

Is the Pebble flow a battery-powered travel trailer?

And the battery-powered revolution has begun in the RV industry, too, thanks in large part to the official drop of the all-electric Pebble Flow travel trailer. California-based Pebble first announced its electric travel trailer back in 2023.

What kind of battery does a flow EV use?

The Flow is powered by a 45-kWh lithium-ion battery built into the floor of the camper. That's slightly smaller than the batteries built into compact EVs currently on the market, and about half the size of the auto industry's largest EV batteries.

What is a pebble flow RV?

The Pebble Flow RV is built on an all-aluminum space frame using lightweight composite and sustainable materials. The sturdy frame of the Pebble Flow, along with its lightweight construction, makes this unique travel trailer durable, aerodynamic, and efficient. (Source: Pebble).

Can a pebble flow hitch a travel trailer?

Here's a man using the Pebble App to move his Pebble Flow into position to hitch it to his tow vehicle. (Photo source: Pebble) The travel trailer is 25' long (tongue included), 7.5' wide, and 8.7' tall with a GVWR of 6,200 pounds. The Pebble Flow actually has two separate battery systems.
