

**BLINK SOLAR**

# **Rabat electric storage vehicle solar container lithium battery pack**

## Overview

---

What materials can SABIC provide for electric vehicle battery packs?

Depending on material and design requirements, SABIC's Specialties business can provide a number of materials for electric vehicle battery packs, including bus bar holders, covers, brackets, end plate assemblies and enclosures for battery management systems, control units, fuses and relays, etc.

What is a battery enclosure?

While the battery cells themselves get a lot of attention, the enclosure – the box that holds everything together – is just as critical. It's more than just a container; it's a vital structural component, a protective shield, and the interface between the battery and the vehicle or boat. **1 What's a Lithium Battery Pack and Its Casing?**

.

What are the components of an EV battery pack?

- Low-Voltage (LV) Components: Connectors, wiring harnesses for communication and control (like the Battery Management System – BMS). (See Fig 1: Basic Battery Pack Structure) The enclosure holds all these parts securely and mounts the entire battery system to the EV chassis or boat structure.
- Lower Case/Tray: This is the workhorse.

What is a lithium battery pack and its casing?

What's a Lithium Battery Pack and Its Casing?

A typical Li-ion battery pack consists of:

- The Enclosure: Usually split into an upper cover and a lower case (or tray).
- Li-ion Cells: The core energy storage units.
- High-Voltage (HV) Components: Connectors, busbars, etc., for power transfer.

## Rabat electric storage vehicle solar container lithium battery pack
