Reasons for the power of Türkiye s solar container communication stations

GRADE A BATTERY

LiFepo4 battery will not burn when overchargedover discharged, overcurrent or short circuitand canwithstand high temperatures without decomposition.

Overview

Does Turkey's largest container port have a shore power system?

Turkey's largest container port, Asyaport, has unveiled an innovative shore power project, the company's press service reported. This system allows moored vessels to receive electricity from the shore, effectively eliminating harmful emissions such as CO₂ and NO_x. The first vessel to test the new system was the 199,300 dwt MSC Oscar.

Which container ships use shore power at asyaport terminal?

The container ship MSC Oscar was the first to use the new shore power connection at the Asyaport terminal. Image Credit: MSC Turkey 's largest container terminal has added a shore power facility to help ships reduce their emissions.

Does asyaport have a solar energy system?

The first vessel to test the new system was the 199,300 dwt MSC Oscar. Asyaport already generates 6% of its electricity from solar sources, aiming to meet all of its energy needs in a sustainable manner in the future.

Does asyaport have onshore power?

The newly installed onshore power capability is an addition to the terminal's existing portfolio of features that reduce terminal emissions. Asyaport already runs exclusively on electrified crane operations to efficiently and sustainably position containers across the terminal.
