# Reset circuit breaker factory in Congo

## Overview

---

How long does it take a breaker to reset?

**Wait for Automatic Reset:** When an overcurrent or fault condition occurs, automatic reset breakers trip and disconnect the circuit. After a predetermined time delay, typically a few seconds to a few minutes, the breaker automatically resets itself and restores power to the circuit.

What is a tripped breaker?

The terms "tripped breaker" or "tripped circuit" denote situations where the circuit breaker has automatically switched off due to an overload or short circuit, effectively cutting off the power supply to that specific area. This comprehensive guide aims to provide an in-depth understanding of circuit breakers and how to reset them.

What happens when a breaker resets itself?

After a predetermined time delay, typically a few seconds to a few minutes, the breaker automatically resets itself and restores power to the circuit. **Monitor for Recurring Trips:** While automatic reset breakers offer convenience by automatically restoring power, it's essential to monitor the circuit for recurring trips.

Why is my breaker not resetting?

**Short Circuit:** A short circuit can cause significant damage to electrical circuits and may prevent the breaker from resetting. Inspect the affected circuit for signs of a short circuit, such as burnt wires or a strong burning odor. If a short circuit is detected, it's essential to rectify the issue before resetting the breaker.
