Reset the battery of outdoor base station

Overview

What is a Base Station reset?

A Base Station Reset is a reboot of the SimpliSafe system that forces it to search and re-establish all of its connections. This is a good first step if the system ever acts up, similar to rebooting a computer or cellphone.

How do you remove a battery from a base station?

Remove The Base Station's Battery Turn the base station over to access the battery compartment at the bottom of the device, and use a Phillips-head screwdriver to remove the cover. Once loose, remove the battery cover to access the batteries. Take out one of the batteries from the base station and wait 10 to 15 seconds.

Is there a way to on-site reset the base station?

Not at location to on-site reset. Now can't communicate with base station. Accessing the Base Station remotely would use the same connection that seems to be currently down. So unfortunately no, the only way to troubleshoot would be to be at the location. Once the Base Station is powered again, however, it should come back online on its own.

How long does it take to connect a battery to a base station?

After waiting 10 to 15 seconds, reinsert the battery into its compartment and screw the cover back into place. Plug the power adapter into the base station. You'll need to wait one to two minutes for a new connection to be established.
