Reykjavik Energy Storage Peaking Power Station Project

Overview

What makes Landsvirkjun a good power station?

In operating power stations, emphasis is placed on a holistic vision, where prudence, reliability and harmony of the operations with environment and society are the guiding principles. Landsvirkjun is the National Power Company of Iceland. We produce electricity from renewable energy sources; hydropower, geothermal energy, and wind.

How many power stations are there in Iceland?

We operate fourteen hydropower stations, three geothermal power stations and two wind turbines for research purposes in five operating areas in Iceland. In operating power stations, emphasis is placed on a holistic vision, where prudence, reliability and harmony of the operations with environment and society are the guiding principles.

Where is the Hellisheidi power plant located?

The area has been studied extensively for the purposes of geothermal production. Operated by Orkuveita Reykjavíkur, the Hellisheidi power plant is a combined heat and power plant located to the north and south of the Hengill central volcano which is located in the western volcanic zone SW-Iceland, approximately 20-25 km southeast of Reykjavík.

Reykjavik Energy Storage Peaking Power Station Project

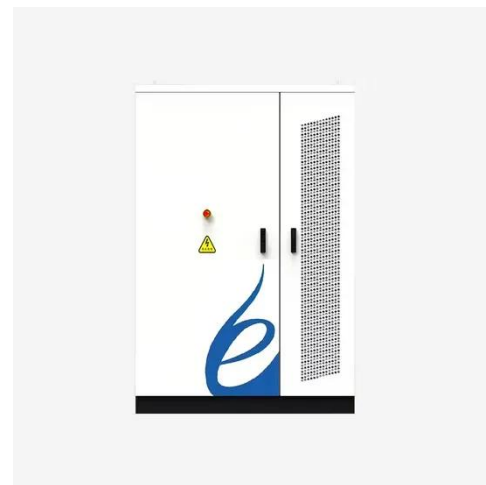

The Geothermal Capital of the World turning Net-Zero with ...

The Silverstone project will allow Reykjavik city to become a capital city run on net-zero energy. The Silverstone project The EU-funded Silverstone Project will transform the ...

Reykjavik energy storage plant operation

ject Research Projects and Publications. Project T eme: Economics, Policy and Business; One option is usin borehole thermal sources," Operated by ON Power, a subsidiary of Reykjavik ...

Power stations
