Rooftop solar panels installed for personal use

Overview

Is your roof fit for a solar panel system?

Not every roof is fit to host a solar panel system. A flat angle or partially shaded, inadequate space - in such scenarios, efficiency becomes poor. Hence, it requires proper analysis before final installation from an experienced solar installer by conducting site inspections, and rooftop evaluation for efficient production.

How to choose a solar roof?

Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.

How to install solar panels on the roof?

Here is a stepwise description of how to install solar panels on the roof: Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area.

Home Rooftop Solar Panel Installation , A Complete Guide

Follow this step-by-step guide to installing rooftop solar panels at home, covering assessment, permits, equipment, installation, and system maintenance.

ENERGY STORAGE SYSTEM

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled
