

BLINK SOLAR

San Diego High Power Inverter

Overview

Who makes power inverters?

EPC Power is the only manufacturer in North America producing grid-scale power inverters. A power inverter is a device that converts electricity between AC (Alternating Current) and DC (Direct Current). AC electricity is the type that powers our homes through power lines, while DC electricity is commonly supplied by batteries.

Can you repair a high power inverter?

We have a large inventory of parts for old inverters that are no longer supported. Contact us to find out if we can help repair your inverter! We specialize in repairing High Power Inverters, including 12, 24, or 48 volt DC to 120-240 AC voltage models made by all manufacturers.

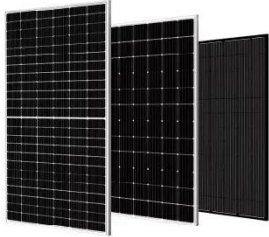

What are EPC power inverters used for?

EPC Power inverters are utilized in various applications, with the primary uses in solar and large-scale battery storage facilities. These facilities store excess electricity generated by solar panels during the day and provide power at night when solar panels are not generating energy.

What is the difference between AC and DC power inverters?

AC electricity is the type that powers our homes through power lines, while DC electricity is commonly supplied by batteries. EPC Power inverters are utilized in various applications, with the primary uses in solar and large-scale battery storage facilities.
