# **Sao Paulo Brazil Energy Storage Demand 2025**

## Overview

---

Will Brazil install a battery energy storage system in 2024?

A study by Brazilian consultancy Greener has indicated that the country installed 269 MWh of energy storage capacity in 2024, growth of 29% from 2023. Demand for battery energy storage system (BESS) components grew 89% in Brazil from 2023 to 2024 and most of the resulting systems are likely to be installed in 2025.

What is driving Brazilian energy storage demand?

An unreliable grid is driving Brazilian energy storage demand. The world is set to have more than 760 GWh of energy storage capacity by 2030, led by Chinese and United States markets dominated by utility-scale systems.

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Does Brazil have a good energy transition?

On the one hand, Brazil's energy transition is well under way. The country has the cleanest electricity generation among Group of 20 members and has seen a significant increase in wind and solar generation in the past few years. Energy storage is expected to take off soon.
