Sarajevo solar power roof tiles

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Are integrated solar roof tiles energy efficient?

Energy Efficiency: Integrated solar roof tiles offer high energy efficiency by converting sunlight into electricity, just like traditional solar panels. They are designed to maximize energy capture while providing long-lasting durability.

Which roof tiles have solar cells?

With fully integrated solar cells directly in the roof tiles, you can gaze upon a beautiful roof, while at the same time using the sun's natural energy to power your household. SolTech RooF is a larger roofing tile with fully integrated solar cells. With a durable design it completely replaces other tile alternatives.

What is soltech roof?

SolTech RooF is a larger roofing tile with fully integrated solar cells. With a durable design it completely replaces other tile alternatives. The adaptable system can include a dummy to give your roof the same appearance, even close to the edges.
