

BLINK SOLAR

Senegal Solar Container Smart Procurement Contract

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg 197mm
/7.7in

Product voltage: 3.2V

internal resistance: within 0.5

Overview

In April 2025, AXIAN awarded the engineering, procurement, and construction (EPC) contract to Voltalia and Entech Smart Energies. Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development was recently signed. The Kolda project will encompass a 60MWp PV solar plant coupled with a 90MWh storage system.

When will a solar power plant be built in Senegal?

“This agreement paves the way for the construction to begin in May 2025, with the deployment of a 60MWp photovoltaic plant coupled with a 90MWh storage system.” Voltalia is to supply the PV infrastructure for the solar power plant, which will operate on Senegal’s national grid managed by SENELEC.

Why do African countries start RFPs for solar and storage projects?

AFSIA’s Africa Solar Outlook 2025 report pointed out that an increasing number of African countries are starting Requests for Proposals (RfPs) for projects including both solar and storage, as there is a growing understanding of the technical advantages of storage as well as its price evolution.

What is Axian Energy doing in Senegal?

Last November, Axian Energy confirmed that it closed a €84 million (around \$89m) financing deal for the project set to provide clean, reliable energy for more than 230,000 people (or 25,000 households) in Senegal’s Kolda in the Casamance region in the south of the country. Axian Energy said the project is scheduled to be completed by 2026.

Senegal Solar Container Smart Procurement Contract

Senegal solar inverter equipment container

Each container is equipped with 18 pieces of 465W TOPCon bifacial PV modules, a 10kW off-grid inverter, three 10kWh lithium batteries, and an EV charging station-- collectively generating ...
