Senegal Southern Power Grid Energy Storage Station

Overview

The facility combines 16 MW of solar generation with a 10 MW/20 MWh lithium-ion battery energy storage system, connected to the national grid operated by Senelec under a 20-year take-or-pay public-private partnership. When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”.

Will Senelec save the grid?

With this project, the private company will support Senelec in reducing its dependence on reserve capacity derived from thermal plants. Senelec estimates that the battery energy project will save the grid an estimated \$165 million over its operating life.

Does Senelec have a capacity change agreement with a private company?

Senelec, the national electricity company in Senegal, has signed a 20-year Capacity Change Agreement with a private company for 160MWh or 40MW through a battery energy storage system (BESS) in the West African country.

Senegal Southern Power Grid Energy Storage Station

Senegal enters agreement for 160MWh battery energy storage

Senelec, the national electricity company in Senegal, has signed a 20-year Capacity Charge Agreement with a private company for 160MWh or 40MW through a battery ...

With the Launch of Walo Storage, a New Era Begins for Senegal's Energy

Dakar, Senegal, Aug- Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in ...

A New Era for Senegal's Energy Landscape - BulBat

Walo Storage is an exemplary model for sustainable energy development, offering a unique combination of solar power, battery storage, and grid frequency regulation.

CAN A DIRECT CONNECTION OF MULTIPLE ENERGY STORAGE DEVICES SOLVE ENERGY

What are the synchronous devices for energy storage power station grid connection Synchronous condenser (SC) technology and Battery Energy Storage Systems (BESS) complement each ...

 TAX FREE    

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW 115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled
