# Single-phase 10kw industrial frequency inverter

## Overview

---

What is a 7-10kw single phase string inverter?

Real-time monitoring and information control can be realized. 7-10kW Single phase series string inverter bring more power generation to users by adopting three MPPT design. Smaller size , lighter weight, the simpler installation , more convenient transportation.

What is a 10kW inverter?

This off-grid, backup power 10KW inverter is perfect for business, hotels, large homes, farms and other applications that require huge amounts of backup power. \* Utility battery charging current 0A - 30A option. \* Full protections against over-load, over-voltage, over-charge, over-discharge, short-circuit etc.

What is a 10kW single-phase inverter based on a GaN device?

A 10kW single-phase reference design based on GaN devices Figure 3 is a schematic representation of the converter. DC/DC Boost with MPPT1 Input range: 50-500V ISC: 18A Max. DC current: 14A Figure 3. Single-phase string inverter reference design block diagram Two boost converters for two independent string inputs, each 5kW rated (134kHz).

What are the applications of inverters in backup power systems?

The application for inverters used in backup power systems is to provide a reliable and seamless power supply during utility grid outages or disruptions.
