# **Single-phase financing for mobile energy storage containers used in farms**

## Overview

---

Are energy storage projects different than power industry project finance?

Most groups involved with project development usually agree that energy storage projects are not necessarily different than a typical power industry project finance transaction, especially with regards to risk allocation.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is financing for storage?

Financing for storage is simply an extension to the well-developed financing for residential PV systems, removing one potential barrier for growth. Design and performance of the systems are focused on supporting the PV system, limiting the variability and multi-performance regimes usually responsible for increased costs.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);
