Slovenia computer room UPS uninterruptible power supply quotation

Overview

What is uninterruptible power supply (UPS)?

For instance, when designing server rooms, they require uninterruptible power supply (UPS) systems that deliver complete power protection for critical IT applications. These components must also be able to accommodate growth and expansion while maintaining cost-effective performance.

What is a server room UPS system?

In most cases server room UPS systems will be of the online double conversion type, although line-interactive UPS can also be used in certain rackmount applications. As computing requirements grow, so will a server room's power requirements.

Where can I Find my server room UPS?

Find your server room ups easily amongst the 49 products from the leading brands (SOCOMEK, IBAN, Layer Electronics, .) on DirectIndustry, the industry specialist for your professional purchases.

What are the different types of ups?

Different types of UPS systems can be found protecting server rooms. In some cases, larger freestanding UPS systems can provide power to many racks, while in other cases rackmount UPS systems can be found providing power to components in one or two racks.
