Can I use solar panels for 240V bore water pump?

Using Solar Panels for 240V bore water pump. Just dug my own bore and have plenty of good clean (free) bore water but no good if it adds to the power bills. Add to that my water bill is around \$400. The pump I am planing on using is a .75Kw pump so I figure the current draw would be around 3.5 amps. Is that right?
