# **Solar booster water pump launched**

## Overview

---

[Taizhou, China, June 2024] - Taizhou Yide Pump Industry Co., Ltd., a leading innovator in fluid handling technology, has launched its latest solar Submersible Pump designed for deep well applications, residential water supply and agricultural irrigation. What is a solar pump booster in the SQB series?

The solar pump booster in the SQB series is used for pumping water from wells and ponds, increasing water pipe pressure, garden irrigation, and automatic water supply systems. It features a simple construction, economical design, high durability, and reliability. Voltage: DC 24V, DC 48V, DC 72V. Power: 210W~750W. Max. head: 60m.

Why should you choose a solar booster pump supplier?

Our Solar Booster Pump offers exceptional quality within the Water Pump category. Collaborating with a water pump supplier for wholesale acquisitions can significantly reduce costs, streamline procurement processes, and enhance product availability.

What is a solar water pump?

Solar-powered water pumps use the sun to generate power and efficiently move water from a well, storage tank, pond or other water sources to the desired location. They work well for irrigation, livestock, bird baths, and off-grid applications, and are an excellent alternative to traditional water pumps. Profile:.

Which water pump is best?

For many sites, a solar pump is often the best. The solar powered water pump is water-pumping machinery that runs on sun energy. Solar pumps are specifically designed to accept DC power directly from the solar modules and are optimized for operating under less-than-ideal sun conditions.
