# **Solar container solar container battery**

## Overview

---

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

Can a solar array be used inside a container?

Solar arrays inside of a container are applicable in a number of ways. Constant improvements in PV technology make it a great, future-proof solution. Below you can find just a few examples of the possible applications. The abundance of sunlight in the deserts makes solar-powered systems the most obvious choice in these areas.

Why do you need a solar container unit?

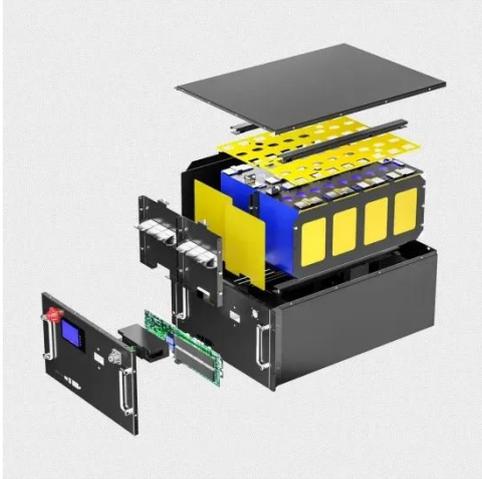

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What is a battery container?

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).
