Solar external glass

Overview

What are solar glass products?

Available with added functionalities, such as transparent conductive coatings or anti-reflective coatings, our solar glass products not only offer durable transparent protection to solar panels, but also become a functional component of solar modules.

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

Which solar glass products are suitable for thin film photovoltaic technology?

Range of coated solar glass products designed for thin film photovoltaic technologies, including a comprehensive choice of TCO glass (Transparent Conductive Oxide coated glass) products with haze and conductivity levels optimised to suit each specific thin film photovoltaic solar technology, also available on low iron glass.

What is Photovoltaic Glass?

Unlike traditional solar panels that absorb visible light, photovoltaic glass converts primarily ultraviolet (UV) and infrared light into electricity, making it suitable for windows, facades and other transparent surfaces of buildings, vehicles and equipment.
