

BLINK SOLAR

Solar glass in Brussels

GRADE A BATTERY

LiFepo4 battery will not burn when overcharged over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

What is AGC solar glass?

The AGC solar glass range covers two main applications: Building Integrated Photovoltaics (BIPV) (electricity generation) and Concentrating Solar Power (industrial electricity generation). BIPV glazing has a dual role: it is part of the outer structure of the building, while at the same time generating electricity using photovoltaic energy.

Where is Glas Trösch building a sustainable flat glass production site?

Swiss group Glas Trösch plans to build a sustainable flat glass production site in Lommel, Belgium. With an area of 35 ha, the former Philips site will become home to one an important factories for the production of flat glass for the construction and solar panel industry.

Will Glas Trösch be able to supply 300000 homes a year?

The plant will have enough capacity to supply 300,000 homes with glass each year and create up to 1,300 new jobs in the region. Glas Trösch wants to meet the need for more locally produced glass for Belgium and neighbouring countries. Lommel has a long glass tradition.

How does Glas Trösch produce a sustainable future?

Glas Trösch wants to produce as sustainably as possible in Lommel, with solutions - from reusing the heat from the glass furnace and converting it into electricity to the optimal use of groundwater and rainwater. Furthermore, up to 100,000 m² of solar panels are provided.
