## Solar junction box

## Overview

---

What is a Misol Solar junction box?

The MISOL solar junction box comes attached with MC4 connector plus cable. This solar junction box is suitable for a 200W to the 300W solar panel. It has six diodes units and has a rated current of 13A. Its maximum working voltage is DC 1000V, and its safety class is II. The shell protection degree is IP65.

What is solar panel junction box?

A solar panel junction box is a critical component of any solar energy system, allowing the safe connection between the photovoltaic (PV) panels and the rest of the electrical system.

How do I choose a junction box for my solar panel system?

For outdoor use, it's crucial to select boxes specifically designed for photovoltaic (PV) applications with appropriate weather resistance ratings. When selecting a junction box for your solar panel system, consider compatibility with your specific panel type and other system components like inverters and charge controllers.

Why are junction boxes important for solar PV systems?

In conclusion, junction boxes are a vital component of solar PV systems, facilitating safe and efficient energy transfer. Understanding the various types, their features, and how to choose the right one can significantly impact the performance and longevity of your solar energy system.
