

## BLINK SOLAR

# Solar outdoor power box

## Overview

---

What is the Solarbox and how does it work?

The Solarbox is a new municipal waste collection system that operates by compaction. It functions autonomously without the need for electrical power, thanks to the installation of a battery system and solar panels on the top of the equipment.

What is a solar battery box?

This product is perhaps more commonly called a "solar battery box" but is also referred to as a "pole mount battery box". Some battery boxes are large enough to be considered battery cabinets and are usually made from painted steel. Battery enclosures keep your batteries safe from weather and safe from theft.

What is a smart solar box?

The Smart Solar Box was discovered by accident (like every other product on ClickBank) during an emergency. What's under the hood is an array of folding solar panels, hooked up to a charge controller which then charges new or used car batteries. You can then use this system to power some of your lights or appliances.
