Solar panel replacement system

Overview

Do solar panels need to be replaced?

Over the lifespan of a solar and/or battery system, some of its components may need replacement. You'll need professional assistance to replace and recycle equipment. Keep an eye on your solar system's performance through regular monitoring.

How does solar panel removal work?

The solar panel removal process is straightforward. Once you've selected a trained professional, they will come to your property to shut down the system and safely de-energize it. Then, they will remove the solar panels from your roof, along with the racking/mounting hardware and any wiring or other system components that are on the roof.

Should I remove my solar panels after a roof replacement?

Whether replacing shingles or doing structural repairs, it's important to temporarily remove your solar system to prevent any damage to the panels or the roof. After completing your roofing project, we'll expertly reinstall your panels to keep your energy production intact.

Can solar panels be reinstalled on a new roof?

Relocation of Solar Panels: If you are remodeling your home or building an addition, you might need to relocate your solar system to a new roof area. This ensures your system continues to operate efficiently while optimizing exposure to sunlight. Suntrek's team will safely remove and reinstall your solar panels in the most advantageous location.
