Solar power with grid backup in Sydney

Overview

Do you need a backup plan for an off grid Solar System?

Off grid owners often have to be semi-experts in maintaining their energy systems. Outage Risk: If a battery bank runs flat (such as after several cloudy days) and the generator fails, the home will be without power. In short, every off grid solar system owner should have a backup plan in place.

How do solar panels work in Australia?

In Australia, on grid (“grid-tied”) solar panels are installed on the roofs of homes. These systems generate electricity for the home and send excess power back to the grid (For more information, visit: energy.gov.au). In many Australian cities and suburbs, on grid systems are ideal, benefiting from reliable grid access and abundant sunlight.

Should I add battery storage to my solar panels in Sydney?

Adding battery storage to your solar panels in Sydney isn’t a requirement, but it can offer advantages such as: Energy Independence: With batteries, you can store excess solar power for use when the sun isn’t shining, reducing reliance on the grid.

Where are off grid solar systems used in Australia?

Off grid solar systems are used in rural and remote areas of Australia. Common where grid access is too expensive or unreliable. In fact, around 2% of buildings or properties in Australia are completely off grid. The majority of these are in regional or remote areas.
