Solar water pump installation in Togo

Overview

What services does EMT offer in Togo?

EMT, a Grundfos distributor in Togo, has expertise in drilling boreholes and offers a range of integrated services in civil engineering, water and sanitation. Manually operated hand pumps — with all their drawbacks — are still widespread in many rural regions of Togo.

Can solar power replace hand pumps?

The government is addressing the problem by contracting with companies such as the Lomé-based Entreprise Moderne de Technologie (EMT) to replace hand pumps with highly reliable solar-powered technology that supplies a strong, constant flow of water at the turn of a tap.

Can a submersible pump be used in Sokodé's borehole?

Leon Roland Elongue Akame, the Senior Sales Manager for Grundfos SafeWater in West Africa, says the solution for Sokodé was to install a Grundfos SP submersible pump in the district's borehole. The pump is paired with renewable solar inverters and solar panels.

What is the Sokodé water project?

Amadou Assoumanou, who is Head of Planning, Monitoring & Evaluation at the Sokodé regional office of the Ministry of Water and Village Water Supply, says: "The project aims to help the government to achieve its goal of ensuring safe drinking water for all its citizens."
