Solar yard fully covered with glass

Overview

What is a solar patio cover?

Solar patio covers are part of an emerging category of solar that uses a structure other than the roof of your home or business as the framework for a solar system installation. These structures are often commonly referred to as "solar pergolas." Most small-scale solar installations go on the roof, but not every roof is ideal for solar.

Do you need a solar panel patio cover?

Homeowners with unsuitable roofs often favor solar panel patio covers. A solar panel patio cover is a brilliant fusion of eco-friendly technology and outdoor comfort.

How much does a solar patio cover cost?

When factoring in the cost of solar panel installation, typically totaling around \$13,300 for a 6kW solar system after solar tax credits, the overall expenditure amounted to approximately \$18,800. On average, prices for hiring a company to construct a solar patio cover spanned from \$14,300 to \$23,300.

Why are solar panel patio covers so popular?

The popularity of solar panel patio covers is on the rise, driven by a growing number of homeowners seeking to reduce their carbon footprint and cut energy costs. In summary, the installation of solar panels on a patio roof, often referred to as a solar patio cover, is a fashionable and efficient means of harnessing solar energy.
