# **Stockholm solar container communication station Power Supply Plant**

## Overview

---

Does ports of Stockholm have a sustainable project?

Earlier this year, Ports of Stockholm, in collaboration with many other ports and stakeholders, received approval to apply for EU funding for three sustainability initiatives. Ports of Stockholm has announced that it will launch an innovative project that combines OPS and microgrid technology with its partners.

What is ports of Stockholm?

Ports of Stockholm aims to meet future energy needs and strengthen the sustainability of port operations with microgrid technology and OPS.

How is the port of Stockholm working to meet EU regulations?

Staffan Forsell, Chief Strategy and Development Officer, Ports of Stockholm, commented that they are working strategically to meet EU regulations that require onshore connection for ships by 2030. This places high demands on the electricity grid, especially in Port of Kapellskär where the current capacity is limited.

Who funded the sustainable port project?

The Swedish Innovation Agency Vinnova funded the project within the System Demonstrator Sustainable Port program, which is led by the University of Skövde in collaboration with Stella Futura and Ilmatar.

## **Innovation with sustainable microgrid technology will ...**

With new microgrid technology and onshore power supply, Ports of

Stockholm is taking further steps to meet future energy needs and strengthen the sustainability of port ...

LiFePO<sub>4</sub> Battery, safety

Wide temperature: -20~55°C

Modular design, easy to expand

The heating function is optional

Intelligent BMS

Cycle Life: > 6000

Warranty: 10 years
