# Storage of lead-acid batteries in containers

## Overview

---

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

What is a lead acid battery container?

Lead Acid Battery Container - for safe battery storage and transportation. The Battery Transport & Storage (BTS) Container was purposely designed as a lead acid battery container, for the regulation compliant, safe and environmentally responsible storage and transportation of used lead acid batteries.

How far should lead acid batteries be stored?

There should be a minimum of 3 m between the storage of lead acid batteries or battery acid and any offices, retail stores, warehouses or other shop . However, this distance may be reduced given that the stores/shops/warehouse play an integral part in the management of stor.

What is a battery container?

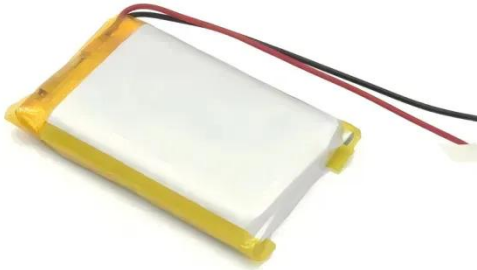

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

How should battery acid be stored?

Battery acid must be stored safely so they are not likely to fall and become damaged, or spill and leak battery acid outside of a spill tray. This includes when packages are stacked on top of each other, noting that the batteries are heavy and if stacked too hi
