Subcontractor of the Milan Energy Storage Project in Italy

Overview

Why is CIP launching large-scale battery projects in Italy?

The development of large-scale battery projects aligns with CIP's growing focus on energy storage. With Italy's supportive regulatory environment, the partnership aims to leverage CIP's expertise to advance its storage infrastructure projects. The move also supports Italy's aim to meet the nation's 2030 renewable energy targets.

Can Italy make battery storage projects commercially attractive?

"Italy has a clear need for storage, and the enabling market and regulatory mechanisms are being put in place to make battery storage projects commercially attractive." CIP's Flagship Fund CI V, completed in March 2025, exceeded its €12bn (\$12.9bn) target.

Will Italy become Europe's most significant battery storage market?

A GCSS spokesperson noted that Italy's strong fundamentals and supportive policy environment position it to emerge as one of Europe's most significant battery storage markets, with the carefully curated projects tactically located to benefit from both northern and southern market opportunities.

How many projects are being built in Italy?

The development pipeline encompasses 14 selected projects distributed across Northern and Southern Italy, with the first projects expected to achieve ready-to-build status in late 2025.
