Sun power inverter 72 volt

Overview

What is the wattage of the Sun 2000 inverter?

Inverter, SUN2000-185KTL-H1, Solar Inverter. Smart Cooling Product Spare Part, Inverter Scroll Compressor, ARI cooling capacity 25.7kW, R410A, 380~480V, 3PH, 50/60Hz, 7800W. Inverter, SUN2000-105KTL-H1, Solar Inverter.

How does a solar inverter work?

Once in standby, the inverter will switch on for a short period (adjustable, default: every 2,5 seconds). If the load exceeds a pre-set level, the inverter will remain on. The solar charger ensures that the batteries are charged by energy harvested from your solar panels. The charge algorithm is programmable.

What type of switch do I need for a low-power inverter?

For our low-power inverters, we recommend our Filax Automatic Transfer Switch. The Filax features a very short switchover time (less than 20 milliseconds) so that computers and other electronic equipment will continue to operate without disruption. No special cable terminals or tools are needed for installation. An IEC-320 male plug is included.

How do I connect a sun inverter to a GlobalLink 520?

The Sun Inverter can be connected via its VE.Direct port to a GlobalLink 520 or a GX device, like the Cerbo GX, and then be remotely monitored via the VRM portal.
