Suriname Uninterruptible Power Supply Procurement Project

Overview

How much electricity does Suriname generate?

Suriname is navigating a challenging phase in its energy transition. As of 2024, approximately 48% of the country's electricity was generated from hydropower (754.5 GWh), with the remainder supplied by heavy fuel oil-based power plants.

Is Suriname navigating its institutional and operational capacity in energy reforms?

Despite progress, Suriname is navigating its institutional and operational capacity in the reforms. Progress is being made, and Suriname launched its Electricity Sector Plan (ESP) 2025–2044 on May 15th, 2025. The NDC sets an unconditional target to achieve over 35% renewable energy in the national energy mix by 2030.

What is the energy mix in Suriname?

This energy mix highlights both opportunity and urgency: while Suriname benefits from abundant natural resources, it remains significantly reliant on fossil fuels and centralized systems. The national grid of the electricity sector in Suriname is segmented into two main systems: EPAR and ENIC, along with a series of smaller interior grids.

Can Suriname serve as a model?

With the right partnerships and vision, Suriname can serve as a model! Blue Planet logo and animation and the five Blue Planets are trademarks of Blue Planet Alliance. The plan marks a shift in the country's energy future, balancing availability, affordability, and environmental sustainability.
