Suspended battery cabinet installation height requirements

Overview

How far apart should IQ batteries be stacked?

Enphase IQ Battery 3, 3T, 10, and 10T test was conducted at the manufacturers recommended mounting distances with a minimum of 6" between vertically stacked units, 1" horizontally between IQ Battery 3/3T, and 6" clearance on the sides for IQ Battery 10/10T. The IQ Battery datasheets detail that they have been certified to UL9540A.

How should a battery room be located?

This will reduce the cost and exposure of the dc distribution system. The battery room shall be located in a way that provides access for lifting equipment to be used during initial installation and future maintenance operations. The location shall be as free from vibration as practical.

Do vented lead acid batteries need a separate battery room?

Vented lead acid batteries installed in medium voltage main substation buildings and unit substations, electrical equipment rooms and control system rack rooms shall not require a separate, dedicated battery room and shall be in accordance with SES E14-S02. The battery room and installation shall comply with IEEE 484, NFPA 70 and OSHA 29 CFR.

Where should batteries be installed in a substation?

Batteries installed in unit substations, electrical equipment rooms and instrument rack rooms shall comply with the requirements of this section, Main Substation Design and Unit Substation Design. In these locations, stainless steel hoods vented to the outside shall be installed over batteries.
