

BLINK SOLAR

Swedish ep500 portable energy storage power supply

Overview

Which ep500 solar power station should I buy?

For example, two EP500 or two EP500Pro are recommended. Besides, the Split Phase Fusion Boxes also are different. BLUETTI EP500 solar power station, a new era of home backup power, is designed to power your entire house/small office.

How long does ep500 take to charge?

At full Solar and AC (outlet) power (Max 1200W Solar Power for EP500), the EP500 will take around 3.23 hours to be fully charged by the sun. Unlike gasoline generators, the BLUETTI EP500 keeps your lights on and laptops charged without upkeep, fuel, carbon monoxide or annoying noise.

How much power can ep500 carry?

If your home's socket features 120V/15A, the equipment carried by EP500 or EP500Pro cannot exceed 1800W. If your home socket features 120V/25A, then EP500 load equipment can be no more than 2000W, and EP500Pro can be 3000W for safety.

How much solar power does a ep500 pro need?

Create your own pack by connecting up to 6 x PV200 Solar Panels for a total of 1200 Watts Solar Power. You can also use your own solar panels on the roof and power up your EP500 Pro with up to 2400 Watts solar power*. To calculate quickly the solar power you need, use the following rule** : # PV200 solar panels = 26
