Syria Emergency Energy Storage Power Supply

Overview

What is the Syria electricity emergency project (seep)?

The Syria Electricity Emergency Project (SEEP) will rehabilitate damaged transmission lines and transformer substations and provide technical assistance to support the development of the electricity sector and build the capacity of its institutions.

Why is the electricity sector struggling in Syria?

The electricity sector has long struggled to meet demand, especially over the past five years, leaving large segments of the population and economy in a persistent state of energy insecurity. Syria's electricity transmission and distribution infrastructure suffers from high losses and needs urgent restoration and modernization.

What if Syria doesn't have reliable energy supplies?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government, making it a key point of leverage. Qatar and Türkiye have stepped in to provide short-term assistance. The two states have provided two floating power stations, while Türkiye is also connecting its grid to Syria.

How much damage has the Syrian electricity sector suffered over the war?

In a recent interview, Syrian Minister of Electricity Ghassan al-Zamel detailed the extensive damage that the electricity sector has endured over the thirteen-year war, estimating direct losses at \$40 billion and indirect losses exceeding \$80 billion.
