Choosing the suitable materials to connect the aluminium frame to the glass laminate is crucial to avoid stress from temperature changes.

Do solar panel installers offer free solar system monitoring?

Depending on your solar panel company, some installers offer complimentary solar system monitoring that allows you to see your solar panel production in real-time and even view your electric usage to modify your lifestyle and make the most out of your solar panel system.

How do I choose a solar installer?

Consult with professional installers. Contacting a local experienced installer for a site visit and consultation can be beneficial.
