# Tashkent Liquid Cooling Energy Storage Management

## Overview

---

As electric vehicles (EVs) are gradually becoming the mainstream in the transportation sector, the number of lithium-ion batteries (LIBs) retired from EVs grows continuously. Repurposing retired EV LIB.

Can liquid cooling system reduce peak temperature and temperature inconsistency?

The simulation results show that the liquid cooling system can significantly reduce the peak temperature and temperature inconsistency in the ESS; the ambient temperature and coolant flow rate of the liquid cooling system are found to have important influence on the ESS thermal behavior.

Does liquid cooling BTMS improve echelon utilization of retired EV libs?

It was presented and analyzed an energy storage prototype for echelon utilization of two types (LFP and NCM) of retired EV LIBs with liquid cooling BTMS. To test the performance of the BTMS, the temperature variation and temperature difference of the LIBs during charging and discharging processes were experimentally monitored.

What is the maximum temperature rise of a liquid cooling system?

With the liquid-cooling system on, from the initial temperature, the maximum temperature rise of the LIBs is 2 K at the end of the charging process and 2.2 K at the end of the discharging process compared with the initial temperature.

What is liquid cooling BTMS?

The liquid-cooling BTMS consists of pumps, air conditioner, pipes, valves and cooling plates mounted on the sides or bottom of the battery modules. The temperature of the battery modules during charging and discharging processes is experimentally tested. A full-scale thermal-fluidic model of the ESS prototype is established.

### Outdoor Cabinet BESS

50 kWh/500 kWh Battery Storage System  
Industrial and Commercial Energy Storage

-  **All In One**  
Integrating battery packs
-  **Intelligent Integration**  
Integrated photovoltaic storage cabinet
-  **High-capacity**  
50-500kWh
-  **Rated AC Power**  
50-100kW
-  **Degree of Protection**  
IP54
-  **Altitude**  
3000m(>3000m derating)
-  **Operating Temperature Range**  
-20~60°C(Derating above 50 °C)
