

## BLINK SOLAR

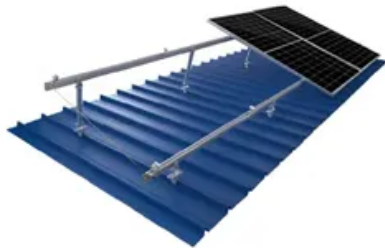

# Tehran Mobile Energy Storage Container 200kWh Government Procurement

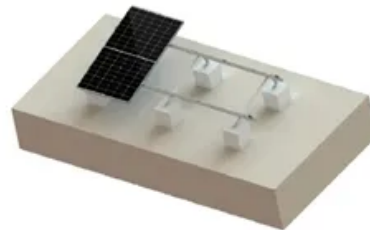

TILE ROOF SOLAR MOUNTING SYATEM

STANDING SEAM ROOF SYSTEM

ADJUSTABLE TILT FLAT ROOF SYATEM

TRIANGLE FLAT ROOF SYSTEM

## Overview

---

Do energy storage resources affect traditional generation projects?

Energy storage resources may be subject to operational constraints that do not affect traditional generation projects. For example, certain battery technologies will degrade more quickly if the state of charge is not actively managed within a certain range.

How much energy storage was deployed in 2024?

Approximately 11.9 gigawatts (GW) of storage was deployed in 2024. In only the third quarter of 2024, and despite mounting concerns over potential trade and policy developments, the US storage market added a record-setting 3.8 GW of energy storage—an 80% increase compared to the prior year.

How does an EPC contract work for energy storage projects?

When developing an energy storage project, a project owner can engage an EPC contractor to provide a fully-wrapped EPC agreement that will encompass the procurement, installation, and commissioning of batteries. In many cases, however, owners will contract directly with battery suppliers for battery supply and commissioning.

What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.
