The first rural 5G base station in the United States

Overview

How big is the 5G base station market?

The 5G Base Station Market size was valued at USD 28.92 Billion in 2024 and the total 5G Base Station revenue is expected to grow at a CAGR of 37.2% from 2025 to 2032, reaching nearly USD 363.13 Billion. The global 5G Base Station market report is a comprehensive analysis of the industry, market, and key players.

Will 5G reach rural markets in 2023?

Having reached much of their 5G coverage and capacity goals in the urban and suburban areas of the U.S. in 2023, the big-three national U.S. wireless operators have turned their attention toward expanding their 5G networks into rural markets.

Which country is deploying 5G?

The United States leads the world in deploying 5G, with more 5G availability than any other country. 5G's faster speeds and more responsive networks are driving strong consumer and enterprise adoption.

Which 5G network is most popular in 2024?

Huawei, Ericsson, Nokia, ZTE, and Samsung are among the world's leading suppliers. In 2024, these five vendors control almost 96.12 % of the global market. China has installed around 12 times as many 5G base stations as the United States. China built more 5G base stations in three months than the United States did in three years.
