The largest energy storage power station in Cebu Philippines

Overview

Is Aboitiz Power Building a hybrid battery energy storage system in Cebu?

MANILA, Philippines — Aboitiz Power Corp. is building a 30-megawatt hybrid battery energy storage system (BESS) project within the Mactan Economic Zone in Cebu. Slated for commissioning in the first half of 2026, the project is poised to become one of the first large-scale energy storage systems in Central Visayas.

What is a hybrid energy storage system in Central Visayas?

Considered one of the first large-scale energy storage systems in Central Visayas, the hybrid BESS will provide ancillary services by storing surplus electricity and releasing it to the grid when needed to help stabilize power supply.

Will EAUC be the first large-scale energy storage system in Central Visayas?

Slated for commissioning in the first half of 2026, the project is poised to become one of the first large-scale energy storage systems in Central Visayas. It will be developed through East Asia Utilities Corp. (EAUC), a wholly owned subsidiary of AboitizPower. Financial details have yet to be disclosed.

What is the capacity of a solar power plant in Visayas?

The first phase has a 25 MW capacity while full capacity is 49 MW. In a statement Monday, the company said the facility will help ensure grid stability and support the country's energy transition, especially with the rising demand in the Visayas as well as increasing value of renewable energy sources.

The largest energy storage power station in Cebu Philippines

Cebu Energy power station

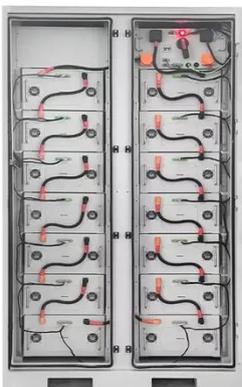

Cebu Energy power station is an operating power station of at least 246-megawatts (MW) in Toledo City, Cebu, Central Visayas, Philippines.
