# The latest news on BESS a Sino-European solar container battery

## Overview

---

Will Europe's new battery energy storage systems grow faster in 2024?

The latest analysis from SolarPower Europe reveals that, in 2024, Europe installed 21.9 GWh of new battery energy storage systems (BESS), just 15% higher than 2023. The predictions of slower growth has come true, but the details reveal a big shift in where installations are happening.

How many battery energy storage systems were installed in Europe in 2024?

: A total of 22GWh of battery energy storage systems was installed in Europe in 2024, marking the 11th consecutive year of record breaking-installations, according to new analysis.

Will 10x Bess be installed by 2030?

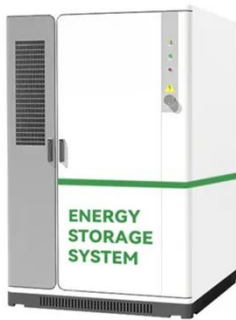

Battery Storage Europe Platform launched last week with a call to 10X BESS installations by 2030. Image: SolarPower Europe The European Union (EU) will not meet its 2030 clean energy targets unless cumulative battery storage deployments rapidly accelerate, SolarPower Europe has said.

How big is battery energy storage in Europe?

That came off the back of the industry deploying 21.9GWh of battery energy storage systems (BESS) across Europe with about 18.5GWh in the EU in 2024, including utility-scale, commercial and industrial (C&I) and residential. It marked the 11 th consecutive year of record-breaking growth.
