The price of solar panels has dropped to 13 yuan

Overview

How much does a solar panel cost in China?

According to the studies done by the International Energy Agency (IEA), more than 60% of the solar panels in the world are manufactured in China. The average cost of the solar panel in China is \$2.92/W. The average price of installation ranges from \$12,410 to \$16,790. Source: China daily Chinese companies are the world's leaders in low priced solar.

Why are solar panels so expensive in China?

The cost of manufacturing a solar panel in China has plunged recently, thanks to lower prices for polysilicon. Sign up for daily news updates from CleanTechnica on email. Or follow us on Google News! Polysilicon is the most expensive component of a traditional solar panel.

How much does a 5kw Solar System cost in China?

Prices have dropped significantly, but quality varies widely across suppliers and system types. A complete 5kW solar system in China costs ¥15,000-¥30,000 (\$2,100-\$4,200), with Tier-1 panels from Longi or Jinko at ¥0.9-¥1.3 (\$0.13-\$0.18) per watt. Installation adds 10-20% to the total price.

How much do solar panels cost?

Global solar panel pricing varies wildly. Manufacturing locations dramatically affect final costs. China produces the world's cheapest solar panels at \$0.13-\$0.18/watt. Vietnam and Malaysia follow at \$0.18-\$0.22/watt. US/EU panels cost \$0.30-\$0.50/watt. Key Insight: Cheapest doesn't mean lowest quality.
