# The role of container solar panels in Buenos Aires

## Overview

---

How much energy do solar panels produce in Buenos Aires?

Average 4.43kWh/day in Autumn. Average 3.22kWh/day in Winter. Average 6.29kWh/day in Spring. To maximize your solar PV system's energy output in Buenos Aires, Buenos Aires, Argentina (Lat/Long -36, -59.9964) throughout the year, you should tilt your panels at an angle of 31° North for fixed panel installations.

Is Buenos Aires a good place to get solar energy?

Buenos Aires, Argentina is a pretty decent place for generating solar energy throughout the year. The amount of electricity you can get from solar panels varies with the seasons. In summer, each kilowatt of installed solar power can produce about 7.75 kilowatt-hours per day.

How to optimize solar generation in Buenos Aires?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Buenos Aires, Buenos Aires, Argentina as follows: In Summer, set the angle of your panels to 20° facing North. In Autumn, tilt panels to 41° facing North for maximum generation.

Why is solar energy important in Argentina?

The north of Argentina experiences high levels of solar radiation and has the capacity to produce electricity and jobs for rural and underserved communities in the country. Unfortunately, there are several factors limiting the total deployment of renewable energy in Argentina.
