

## **BLINK SOLAR**

# **The solar container cost power supply in the northwest of Wellington**

## Overview

---

Is Wellington a good place to invest in solar energy?

Enjoy clean, renewable energy on your terms with \$0 upfront. With 2,053 annual sunshine hours and moderate energy costs, Wellington presents a compelling case for solar energy adoption. The region's consistent solar performance and growing installation rates demonstrate the viability of solar power even in the windy capital.

Why should you choose a solar system in Wellington?

Our range of solar systems offers the perfect balance of savings, sustainability, and resilience. Perfect for Wellington homeowners who want to stay connected to the grid while enjoying significant savings on energy bills. Ideal for those seeking energy independence and backup power during outages, while still maintaining a grid connection.

How can solar power and energy storage help New South Wales?

The project combines the benefits of solar power and energy storage to create cheap, clean, dispatchable and firmed power for New South Wales. The project will have the ability to export 172MW of power into the electricity network thanks to an installed capacity of approximately 240MWp of photovoltaics 'DC-coupled' with 409MWh of energy storage.

What is the Maryvale solar and energy storage project?

The Maryvale Solar and Energy Storage Project is a proposed renewable energy facility located near the town of Maryvale, 12km North-West of Wellington. The project combines the benefits of solar power and energy storage to create cheap, clean, dispatchable and firmed power for New South Wales.
